

Unwinder UW52-770

The Unwinder UW52-770 is a robust, 30 inch web, commercial-grade unwinder capable of processing a wide range of substrates at high-speeds with minimal setup times and maintenance requirements – allowing printers and finishers to do more, faster, while producing a higher quality product.

Features

- Pneumatic tensioning shaft
- Electronic paper lift reduces manual labor during the roll change process – improving workplace safety
- Variably adjustable, constant web tension
- Splice table for quick web changes
- Decurling device removes web curl after machine stop and improves the paper handling
- Robust chain drive for maximum safety and running performance
- Option: Various tensioning shaft diameters
- Option: Automatic splice detection
- Option: Webguide

Technical Specifications

	UW52-770
Production Speed max.	250 m/min (820 ft/min)
Web Width min./max.	150–770 mm (6"–30")
Paper Quality min./max.	40–250 g/m ²
Roll Diameter max.	1,320 mm (52")
Roll Weight max.	1.4 t
